WEBSITE DESIGN AND DEVELOPMENT

We design and develop various types of website and portals. Major of our work experience is on the following three types,

- **Fully Dynamic & Responsive Websites, developed with the latest Core PHP7.4**
    - Static" **means** unchanged or constant, while "**dynamic**" **means** changing or lively. Therefore, static **Web pages** contain the same prebuilt content each time the **page** is loaded, while the content of **dynamic Web pages** can be generated on-the-fly.

- **CMS Portals developed using Wordpress & Joomla**
    - A **CMS** or a 'Content Management System' quite literally allows you to control and manage the content within your web site - without technical training. Using this uncomplicated system you can very easily add, delete images and edit text in your web site on the fly.

- **Online Shopping Portals developed using Opencart, Magento, Wordpress, Prestashop, Shopify,etc**
    - **Online shopping** is a form of electronic commerce which allows consumers to directly buy goods or services from a seller over the **Internet**

SEO & PPC SERVICES
(Digital Marketing0

Yagna offers quality SEO & PPC(Pay Per Click)Services.

❖ SEO :

Search engine optimization is the process of increasing the quality and quantity of website traffic, increasing visibility of a website or a web page to users of a web search engine. SEO determines the ranking of any websites over the Internet. It requires expertise to align the sides according to the Search Engines Algorithms.

❖ PPC :

Pay-per-click, also known as cost per click, is an internet advertising model used to drive traffic to websites, in which an advertiser pays a publisher when the ad is clicked example Google Adwords, Facebook Ads, Instagram ad, Linkedin Ads
